

B.A. Control Timer @³ RFID and transmission module, for three teams, digital

Order number: AS-01070

The B.A. Control Timer @³ has been developed by active firefighters to make the b.a. control safe, fast and efficient. It is designed especially to be used by the officer-in-charge to have all relevant information at a glance.

The tool is easy and intuitive to use. It is possible to save operation times and retrieve them anytime. It remembers the officer-in-charge to his control duty. The complete operation time is shown permanently.

Big, high visible LED give a fast overview of the situation of the operating unit. The system is designed for three units with an operating time of 21 or 30 minutes. Each unit can be managed by only one button. Alerts are signalised acoustically, visually and haptic.

- optimised tool size
- cost-efficient
- internal memory capacity for eight operations

dimensions: approx. 165 x 80 x 50 mm
weight: approx. 300 g (incl. Batteries)
