

## rescue-tec Set Runners (2 pieces), for RIT-Bag (9 l version), with screws

**Order number:** AS-05025-E2

Innovative addition for retrofitting all rescue-tec RIT-Bags (9 litre version) up from March 2014.

With the runners the RIT-Bag is even easier to pull and to move on uneven surfaces or steps.

The abrasion-resistant plastic runners are made of solid material. They will be firmly attached with the base plate by the screws supplied. The screw heads are fully recessed thus the runners have a continuous smooth surface and the frictional resistance is reduced.

For mounting the runners only the screw connection on the base plate has to be loosened and the screws have to be replaced (nuts and discs will be reused).

Set consist of:

- 2 runners
- 6 countersunk-head screws

material: PE black

dimensions: 80 x 3 x 2 cm

hole spacing: 36.6 cm

hole diameter: 8.4 mm

weight: 0.88 kg
