

Antari FT-100 Fog Machine, incl. control

Order number: AU-01008

This robust fog machine for fire and rescue services has been specially designed for training purposes. The 1300 watt heating block is capable of generating a large volume of dense fog in a short time to simulate the dense smoke of a fire. Even when wearing work gloves, you can operate the FT-100 machine with ease.

- Two large rotary knobs to set output and timer
- LCD display
- can also be controlled via an external DMX controller
- Robust carrying handles, sturdy metal housing
- Removable tank
- Application - standing

Included in delivery:

- 1x fog machine
- 1x mains cable/power cable
- 1x remote control
- 1x battery
- 1x container
- 1x filter
- 1x operating instructions and declaration of conformity

Power consumption: 1300 W

Power supply: 230 V/50 Hz

Output: approx. 566 m³/min

Heating time: approx. 10 min

Tank volume: 6 l

Fluid consumption: approx. 100 ml/min

Protection class: IP20

Dimensions: 580 x 278 x 265 mm

Weight: 15 kg
