

## **FireSales Fog Machine Cumulus 1300 W, emission: 1000 m<sup>3</sup>/min, with wired timer remote**

**Order number:** AU-01132

The FireSales Cumulus is developed, based on years of experience of FireSales. The machine can easily and quickly fill a room with smoke, but can also create a smoldering fire, since the output is adjustable from 1 to 99 %. Up until 48 % a continuous output is possible. It is possible to make a vertical column of smoke by putting the machine on its backside. This generates a realistic build-up of smoke against the ceiling. The enclosure is made out of robust stainless steel and has 6 vent holes for optimal heat discharge. The front side of the machine is equipped with a Storz connection easily connection with a smoke hose. Furthermore, the Cumulus has a build-in timer and control via DMX is possible.

Supplied with:

timer remote control with 10 m wire

5 l FireSales fog fluid middle

transport box (60 x 40 x 32.5 cm)

at maximum output 1000 m<sup>3</sup>/min fluid consumption: 120 ml/min

at continuous output 300 m<sup>3</sup>/min fluid consumption: 35 ml/min

dimensions: 50.3 x 25 x 24.5 cm

voltage: 230 V, 50 Hz/120 V, 60 Hz

power: 1300 W

tank capacity: 5 l

heating time: 7 min

weight: 10.5 kg
