

FireSales Fog Fluid Feuerwehr Extreme, 5 ltr

Order number: AU-01185

Fog fluid for simulations with large smoke demand.

- produces dense smoke, which can move up to 2km in the outside air under suitable weather conditions and remains visible for a long time
- especially for staging where a lot of smoke is needed (tunnel- industrial fire and forest fire)
- increased heat resistance, falls apart less quickly in fire and smoke containers
- based on water and glycol

content: 5 l

dimensions: 19 x 15 x 24 cm

weight: 5,3 kg

Perfect for simulating tunnel fires, forest fires and industrial fires.

Realistic fog for large outdoor operation scenarios. The smoke fluid is made of the purest ingredients and is one of the safest smoke fluids for people and machines. One of the main ingredients is water. Suitable for all modern water-glycol smoke machines such as Nimbo, Cumulus, Stratus. The fog fluid can be used horizontally and vertically and is therefore versatile. Due to the increased heat resistance, the fog fluid Extreme is ideally suited for fire containers.
