

## Ruth Lee Mass Casualty Training Manikin, adult, weight 4 kg, size 1.80 m

**Order number:** AU-02004

A cost effective manikin when large numbers of casualties are required - they are lightweight (approx. 4 kg) and would be perfect for multi-agency exercise where a large number of casualties/bodies are required to be seen but not necessarily rescued.

- constructed in a lightweight water resistant polyester and filled with flame retardant foam pieces - adult sized at 1.8 m
- anatomically correct so will accept any old clothing available to increase realism.

Strong enough to be buried under concrete or steel lintels with no damage - these manikins are tough!

- can withstand being driven over with a 4x4 vehicle and being dropped from a 2nd floor window onto a concrete floor with no damage
- light weight allows them to be handled by any trainees - light enough to be placed in any situations very easily
- light weight allows for easy storage (can be folded or vacuum packed) and transport

size: 1.80 m

weight: 4 kg
