

Prestan AED UltraTrainer

Order number: AU-02582

The Prestan AED UltraTrainer offers performance features that no other universal AED trainer has and is an exact replica of what current AEDs on the market offer.

This compact and lightweight unit offers trainees a realistic training experience with training pads that register when placed on a manikin. Additionally, the pads are pre-connected and voice commands are clear and calm. Instructors can customize their teaching sessions by turning the compression metronome on or off, or choosing the "ventilate now" command.

- Dual Graphic (Adult/Child) Training Pads
- Pad Sensor System
- Child Mode Switch
- Child-specific AED voice prompts
- automatic or semi-automatic shock simulation
- CPR Coaching, "Beat Now" Voice Commands
- Compression metronome can be switched on and off
- Low battery indicator
- two selectable languages
- 2015 Guidelines compliant and updateable
- Play/Pause button
