

FireSales Spray Foam Practice Extinguishers

Order number: AU-03212

With the Spray Foam Practice Extinguisher students learn all the procedures that they need to command in a real situation. The locking pin needs to be removed, after which a short attempt is made. Subsequently the extinguishing techniques are practiced on the practice extinguisher. In some practice situations foam and even water may not be desirable, thus it is possible to only pressurize the extinguisher. In that case the procedure from choosing the correct extinguishing agent to launching an attempt to extinguish can still be practiced.

The extinguisher is easy to fill by unscrewing the top with a key. Next, add (if desired) a layer of practice foam and water and pressurize the extinguisher with a simple compressor via the valve stem. The filling pressure can be read on the pressure gauge.

dimensions: 52.5 x Ø 16 cm

capacity: 6 l

weight: 4.8 kg
