

Mini-Backdraft-Trainer / Flash-Over-Box

Order number: AU-03246

The Mini Flashover Trainer is meant to simulate a miniature backdraft or a flashover. This way it is possible to practice smoke, flow, temperatures and flames. Watch with this trainer the entire development and build-up of a backdraft or a flashover and practice door procedures.

The trainer is wood-fuelled and has a boiler and a pyrolysis room. These spaces can be separated with a sliding door and are each in turn supplied with an outside door. The oxygen supply and smoke exhaustion can be regulated by means of the slideable roof on top of the trainer. The pyrolysis room has a window that allows to follow the development of the fire. Supports have also been installed which allow for demonstrating the development of a fire in spaces with a suspended ceiling.

housing: stainless steel
dimensions: 60 x 80 x 60 cm
weight: 55 kg
