

## FireSales Extinguishing Trainer Vesta

**Order number:** AU-03253

The FireSales Vesta is small and compact, but it generates a huge flame. The size of the flame is adjustable. To make the Vesta compatible for many situations, FireWare developed active top-pieces. Active means that they work on their own gas supply. The Vesta has a special exit and a separate button on the remote to activate the top-pieces. Thanks to FireWare's experience with many extinguishing trainers, the Vesta is supplied with clever tricks: it's light, it's small, it has a clear, industrial remote control and cutout handles.

- for extinguishing with water, CO<sub>2</sub> or foam
- suitable for level A or C fire
- no water required, thanks to dry burner technique
- works on a battery and with propane or butane
- is operational within 3 minutes
- including industrial remote control
- comes in a robust plastic case
- unique: extra gas outlet for add-ons
