

FireSales Extinguishing Trainer Flange Fire

Order number: AU-03260

The Stand-alone extinguishing trainer flange fire is manually ignited with a separate ignition burner (exclusive). The gas hose is equipped with a squeeze handle which regulates the gas supply from the bottle and also allows for this to be turned off quickly. Closing the gas tap will shut off the gas supply and the exercise has been a success!

supplied with:
transport box

material: stainless steel
