

## FireSales Burning Curbside Waste Container, Fire simulation

**Order number:** AU-05110

The burning curbside waste container ensures a complete simulation of a fire in a wheelie bin. Flames, smoke as well as sound are build in the wheelie bin. The wheelie bin is mobile and as a result easy to transport and suitable for use at many locations. To increase the level of reality all wires are neatly concealed.

A platform is assembled inside the curbside waste container, thus it is possible to place old papers or other waste on this platform. This way the curbside waste container becomes a very realistic waste container that can even be extinguished with a CO<sub>2</sub> extinguisher!

supplied with  
remote control

voltage: 240 V

dimensions: 58 x 74 x 107 cm

weight: 22 kg
