

## FireSales Fire Simulation Kit V4, 9 parts

**Order number:** AU-05125

Everything you need for the quick staging of a complete fire fits in one box. With this complete set you can easily simulate a fire yourself. This set has been the standard for many fire departments and factory security trainers in the Netherlands for years.

When developing the set, all aspects of a fire were taken into account. Thus, all sensory perceptions are addressed, namely sight, hearing and smell. You simulate the flame image with the Mini Silkflame and a FireSpot. With the FireWare Nimbo smoke machine you can make this flame image complete and even more realistic. The smoke machine comes with a wireless remote control with a range of up to 50 meters. The SoundBox V3 was added to the staging with 45 special sounds. With it you can hear the crackling of the fire or have someone call for help, among other things.

You can also irritate your nose and make the scenario lifelike. To do this, use the spray can with the smell spray. And finally, the box contains a practical distribution block for connection to the mains. There is also a plug-on / off remote control to wirelessly control the flame effects. This click-on / click-off makes the exercise even more dynamic.

The SoundBox V3 is a powerful audio player and can be integrated into a WiFi network. With the app several SoundBoxes V3 can be controlled at the same time.

The FireSpot is equipped with a compact stainless steel floor stand. This makes the staging even easier.

supplied with:

Mini silkflame

FireSpot

Remote control click on / off

Nimbo smoke machine with wireless remote control

SoundBox V3

Burn odor spray

Schuko distribution block

Transport box with lid

dimensions: 60 x 40 x 32.5 cm  
weight: approx. 15 kg
