

## FireSales Electronic Practice Gas Cylinder

**Order number:** AU-07140

The electronic practice gas cylinder simulates a leaking gas cylinder. A piping sound can be heard from the built-in speakers and can be controlled using the gas tap.

The gas cylinder operates on a built-in battery, therefore you have no cables. Its effect is therefore extremely realistic. The bottle can function for 6 hours on a full battery.

supplied with:  
charger

dimensions: 46 cm x Ø 22 cm  
weight: 7.7 kg
