

Multiple Casualty Kit, 30 artificial injuries and accessories

Order number: AU-08210

Simulate with the Multiple Casualty Kit simulate various wounds. By using the wounds and accessories it is possible to supply members of the Casualties Union with injuries. This increases the reality of the simulation of a serious accident. There are 24 mouldages and fractures and 5 large wounds.

Attach a blood bag to the large wounds (amputated leg, complicated tibia fracture, complicated upper arm fracture, shot wound in the hand), as a result of which artificial blood is dripping from the wound. There is also a sucking chest wound. This contains a small hole with a little pump so that the suction of air can be simulated manually.

There are different tools in the kit to make up the wounds. Among other: sticky blood, blood powder, modelling paste, broken plexiglass to simulate wounds with glass, make up, body glue, atomizer, tongue blades and methyl cellulose to thicken blood.

size: 25.5 x 23 x 46 cm

weight: 4.1 kg
