

Wireless Remote, for Fog Maschine Nimbo

Order number: AU-09305

The Wireless Remote for Nimbo allows to operate the smoke machine from a distance and wirelessly. So it is possible to dose the quantity of smoke exactly and immediately react to the exercise situation. This way the actions of the student result in more or less smoke. The exercise leader can easily coordinate this.

The remote control exists of 2 parts: a transmitter and a receiver. Under ideal circumstances the range is 50 m, even through a concrete wall. But iron obstacles and interfering radio frequencies can disrupt the range.
