

BasicNature Solar-Charger Basic, 5V / 10W, compact 2-fold solar panel

Order number: CA-01010

The compact and lightweight 2-fold solar panel offers a self-sufficient charging option for battery-powered devices with a USB connection such as smartphones, tablets and power banks.

The high-quality and efficient monocrystalline silicon cells achieve a high level of efficiency and deliver constant current in good sunlight.

- self-sufficient charging option
- high-quality and efficient silicon cells
- compact pack size
- attachment loops and carabiners
- robust, dust- and water-repellent
- with inside pocket

Supplied with:

- 1x solar panel
- 2x carabiner
- 1x micro USB cable
- 1x user manual

600D Oxford nylon fabric water repellent

closed dimensions: 270 x 160 x 20 mm

open dimensions: 465 x 265 x 5 mm

output USB 1 and USB 2: max. 5 V / 2,4 A

the 2 solar panel does not have an integrated charger / battery or charge controller

not suitable for direct charging of individual battery cells.

only suitable for devices with an internal charger, e.g.

smartphones, tablets and power banks

charging time depends on device battery. With e.g.

conventional smartphone with approx. 5000mAh - 7000mAh

battery, the charging time is approx. 2-3 hours. at 70000 lux

(light conditions = full rays of sunshine approx. 100000 lux -

cloudy approx. 10000 lux)
