

Optimus Multifunctional all-season stove Vega

Order number: CA-01022

The most convincing multifunctional all-season stove there is.

The Optimus Vega outperforms the competition, especially when it gets cold.

Minus degrees? Simply use the 4-season mode and turn the gas cartridge upside down and the integrated stand feet to send liquid gas through the pipe. So the soup is always really hot, even at minus 20° Celsius.

Or do you want it to go faster? The "Turbo Boost" function of the 4-season mode reduces cooking time by up to 20%. With the lowest center of gravity in its class, this powerful stove is extremely versatile and stable enough even for larger pots.

- Precise regulation of the flame
- gas cartridge connected directly to stove with hose
- integrated 4-season mode
- integrated feet
- smooth rotary coupling
- 178 g own weight
- CE certified: CE-845CN-000

Delivery without fuel
