

## LAVESE Mobile Washbasin PRO

**Order number:** CA-03805

The mobile and compact LAVESE Pro washbasin has become even more functional. With the additional tip guard, 2 euro dispensers, a stainless steel paper dispenser and a bin liner holder, it can be used wherever there is a need for intensive hand cleaning outside buildings. In addition to its attractive design, the station impresses with its independence from electricity and a fixed water connection as well as its environmental friendliness, because the dirty water does not end up on the floor / in nature, but is collected in the dirty water container.

By the way, LAVESE can also be used to clean small objects or brush teeth - just like at the washbasin at home.

- easy to operate
- compact size - approx. 39 x 55 x 40 cm (W/H/D, without splash guard)
- robust, stable and leak-proof
- portable with padded shoulder strap
- up to 25 hand washes with one tank (8.5 l)
- fully filled, approx. 13 kg light (without splash guard)
- user-friendly thanks to Euro dispenser integrated in the splash guard
- fresh water tank and dirty water tank can be separated
- environmentally friendly due to collection tank for dirty water
- requires neither electricity nor battery
- developed and manufactured in Germany
