

Dunlop Safety Boots made from PVC, EN 20345:2011 S5

Order number: EB-01800

These boots are indispensable for decontamination and hazardous goods operations.

- easy to clean PVC material
- 100 % waterproof
- antistatic sole
- oil, petrol, alkaline and acid resistant
- S5 rated with steel toe cap and midsole

Shaft height: 38 cm

EN ISO 20345:2011 S5

With a robust steel midsole and protective cap, the boots offer all-round safety. They are resistant to oil, gasoline, alkalis and acids, making them ideal for demanding environments. The 100% waterproofness ensures dry feet in flood scenarios. The antistatic sole reduces electrostatic charges and protects against sparking.
