- Cut protection and thermal insulation made of KEVLAR and glass fiber
- Textile strap

Material: Hypalon (CSM), Kevlar, Nomex, neoprene

Size: 5-12

EN ISO 21420:2020 + EN 388:2016 + 407:2020

The HYPA Grip Rescue protective glove is the ideal glove for technical rescue work.

It is one of the few THL gloves with wet grip. Thanks to the special construction of the 3D fingertips, this glove has increased dexterity. The heat-resistant and cut-resistant materials of the HYPA GRIP RESCUE protect against both thermal and mechanical risks during operations.
