

Fire Fighter Glove FALCON EN 659, with long leather cuff

Order number: EB-02310

This glove is the result of a long standing project developed together with the Swedish Rescue Service.

Palm of the glove is made of cow grain leather because that is very strong and durable leather. The back hand does not need such extremely high mechanical performance but is more exposed to intensive radiant heat. Elk leather is protecting better against heat and cold. The use of elk leather for the back hand and gussets between the fingers effects extremely high flexibility.

Care Instructions:
Wash the gloves only with a ph-neutral detergent. Select a program at 40 °C.

sizes: 6–12

Performance levels according to EN 659
abrasion resistance: 3
cut resistance: 2
tear resistance: 3
puncture resistance: 3
burning behaviour: 4
dexterity: 5
