

comazo Flash Hood PBI extra long, Aramid/Lenzing FR/Belltron/PBI, 2 layers, EN 13911

Order number: EB-06005

This flame-retardant hood made of the high-performance fiber PBI is 2-ply and impresses with a super elastic field of vision that provides ideal protection, but gives the wearer optimal freedom of vision every second! The extended neck area offers extra protection. The innovative special seams that run along the sides make the hood very comfortable. The seams are barely noticeable and also reduce pressure. The soft aramid-viscose mixture on the inside of the hood ensures a very soft feel. It is certified according to DIN EN ISO 11612, EN 1149-5 and EN 13911.

- flame retardant
- comfortable thanks to special seams

material inside:

48.5 % aramid

48.5 % viscose / Lenzing FR

3 % carbon fiber / Belltron

material outside: 60 % aramid, 40 % PBI Gold
