

## comazo wild fire flash hood, 1 layer, for FFP2/FFP3 mask

**Order number:** EB-06031

Due to the added volume in the mouth-nose area, the flash hood offers optimal space for using a particle filter, FFP2 or FFP3 mask. The ergonomic design and the use of an elastic band in the field of vision offers maximum protection without restricting the field of vision.

This flame retardant hood is 1-layer and therefore light and breathable, so that the wearer can maintain good operational performance even during exertion or heat stress. Thanks to the special material composition, the hood is very skin-friendly and, in addition to flame retardancy, antistatic properties and sweat management, also offers good elasticity and therefore ideal wearing comfort. Flat seams have been processed in the head and shoulder area to improve the fit.

- formation for FFP mask in the mouth-nose area
- elastic in the field of vision
- light, breathable and skin-friendly
- flat seams

material: 48.5% aramid, 48.5% viscose/Lenzing FR, 3% carbon fiber/Beltron
