- double zipper and storm flap
- elastic hood, cuffs, waist and ankles
- padded knee pads for greater protection and comfort

Sizes: S-3XL

EN 14605 Type 3 and 4, EN 14126, EN 1149

Chemical protection suit with elastic hood, cuffs, waist and ankles. EN Type 3 liquid jet and Type 4 liquid jet chemical protection. The multi-layer barrier film ChemMax' 3 offers high permeation resistance against many dangerous chemicals. Permeation resistance has been tested on over 130 chemicals. The co-extrusion process results in a quiet, flexible and smooth surface that is more like a fabric and does not have adhesion pits where chemicals can attach, as is the case with many chemical protective suits. Barrier against infectious substances - passes all four EN 14126 biohazard tests of the highest classes. Tested for resistance to seven major chemical warfare agents, making it suitable for military, anti-terrorism and civilian protection applications. Lakeland's unique Super B style features a three-panel hood, set-in sleeves and gusseted crotch for improved fit, freedom of movement, comfort and durability. Double zipper and storm flap on the front and built-in knee pads for added comfort and protection. Certified according to EN 1149-5 for static dissipative clothing.
