

## Chemical protective suit ChemMax 4 Plus, extended protection

**Order number:** EB-90003

**The ChemMax 4 Plus Coverall is the highest level of chemical protection within the ChemMax series.** It consists of a six-layer protection system with spun bonded polypropylene and a proprietary barrier film.

- heat-sealed, glued seam
- Multi-layer barrier film also against demanding chemicals and chemical warfare agents
- flexible and smooth surface
- double zipper and storm flap
- elastic hood, cuffs, waist and ankles
- padded knee pads for greater protection and comfort

Sizes: S-3XL

EN 14605 Type 3 and 4, EN 14126, EN 1149

Chemical protective suit with elastic hood, cuffs and waist, double zipper and storm flap. EN Type 3 liquid jet and Type 4 liquid jet chemical protection. Resistant and durable, PermaSure® 4 Plus fabric uses multi-layer polymer films with a high chemical barrier. It offers permeation resistance against demanding chemicals such as bromine (EN Class 2), diethylamine (EN Class 6) and tetrahydrofuran (Class 6), and permeation resistance tested with over 80 chemicals. The co-extrusion process results in a flexible and smooth surface that does not have adhesion pits where chemicals can attach, as is the case with many chemical protective suits. Barrier against infectious substances - passes all four EN 14126 biohazard tests of the highest classes. Tested for resistance to seven major chemical warfare agents, making it suitable for military, anti-terrorism and civilian applications. Certified according to EN 1149-5 for static dissipative clothing.
