

## Ambu Life Key with Nylon bag

**Order number:** EH-05015

The Ambu Life Key is a proven, easy to use, and inexpensive barrier with a one-way valve that prevents direct contact with a patient's mouth, nose and face and helps overcome any hesitations to start resuscitation.

The Ambu Life Key helps protect the rescuer and increases bystander CPR in emergency situations. The face shield and one-way valve is semitransparent allowing the rescuer to visually check the patient's saliva or blood. Standard resuscitation techniques can be used without modification.

The small size of the Life Key means that it can always be carried around, on a key ring, in a pocket or in a first aid kit. It is suitable for any patient, any age group. An elastic ear band fits over the patient's ears to keep the mask in place.
