

Window Buster Evolution, with seat belt cutter

Order number: EH-05023

Set up the Lifehammer onto the window and trigger the ceramic bolt, which breaks the window immediately. The ceramic bolt is almost as hard as diamond, the hardest material known. With this nearly indestructible bolt the window breaks into hundreds.

The guidance for the attached seatbelt-cutting-attachment has been improved for today's softer and more flexible seatbelts, which will be cut through easier. The cutting-surface, as well as the cutting-angle have been increased, which leads to an easier way of cutting through the seatbelt.

With the useful Quick Click System the Lifehammer Plus can be reclaimed even better and faster.

length: 16 cm

weight: 159 g
