

rescue-tec Holster Escape Hood Wunstorf, material rtx® 950, shoulder strap fixation

Order number: HO-01069

To carry and protect a fire escape hood and a carrying sling in two separated compartments. The front compartment can be closed with hook and loop.

Can be fixed with an optional shoulder strap or a karabiner (not included). An emergency release appliance, which releases at a force of 250-300 N, minimises the risk of getting stuck.

On the front side a fleece strip is attached for a reflective shield (150 x 50 mm) which allows individual identification. (without contents)

- flame resistant material, tested in a 6-burner test at 950 (\pm 50 °C) like respiratory protection full-face masks class 3
- emergency release appliance
- the mobility of the wearer is not inadmissible restricted
- the physical burden on the wearer is not increased disproportionately
- the protective function of other PPE is not endangered

material: rtx® 950

dimensions: 30 x 30 x 15 cm

weight: 0.4 kg

meets the following requirements of DIN 14922:2020-02 (Multi purpose bag for fire service use):

- 6.1.1 limited flame spread
- 6.1.3 tensile strenght
- 6.1.4 tear strength
- 6.2 closure system
- 6.3.2 emergency release device
- 10 Instructions for use
