

rescue-tec Holster Kleinwalsertal, material rtx® 950, fixation at b.a. shoulder belt

Order number: HO-01110

Emergency holster to fix at the shoulder belt. With only one move down it can be opened and the rescue knife is ready to hand. The safety strap (not included) protects the knife against lost. A marking pen can also be stored.

An emergency release appliance, which releases at a force of 250-300 N, minimises the risk of getting stuck.

It is ideal combined with the Holster Duesseldorf (HO-01340) or the Multipocket, large (HO-01070). Both were worn at the belt. Thus you have two separated positions for different equipment to prevent confusion. (without contents)

- flame resistant material, tested in a 6-burner test at 950 (\pm 50 °C) like respiratory protection full-face masks class 3
- emergency release appliance
- the mobility of the wearer is not inadmissible restricted
- the physical burden on the wearer is not increased disproportionately
- the protective function of other PPE is not endangered

material: rtx® 950

dimensions: 13 x 5.5 x 4.5 cm

weight: 0.05 kg

meets the following requirements of DIN 14922:2020-02 (Multi purpose bag for fire service use):

- 6.1.1 limited flame spread
- 6.1.3 tensile strenght
- 6.1.4 tear strength
- 6.2 closure system
- 6.3.2 emergency release device
- 10 Instructions for use
