

## rescue-tec Holster Monheim am Rhein, material rtx® 950, with individual text

**Order number:** HO-01345I

Together with the firedepartment Monheim am Rhein developed small belt holster especially for a tubular loop with a carabiner. All popular sizes (width 25-50 mm, length 80-200 mm) fit in this pouch. The side pockets are made for two 3D timber wedges or knives, multitools, ... (without contents)

It can be fixed to a normal leather waist belt, on a hip belt, on a fireman's safety belt and on the Molle-system. An emergency release appliance, which releases at a force of 250-300 N, minimises the risk of getting stuck.

- flame resistant material, tested in a 6-burner test at 950 ( $\pm$  50 °C) like respiratory protection full-face masks class 3
- emergency release appliance
- the mobility of the wearer is not inadmissible restricted
- the physical burden on the wearer is not increased disproportionately
- the protective function of other PPE is not endangered

This holster comes with its own labeling request. The lid offers space (7 x 4 cm) for the vehicle name or the name of the district or both.

material: rtx® 950

dimensions: 13 x 10 x 6 cm
