

## rescue-tec Fire Brigade Multi Purpose Bag, acc. to DIN 14922, with individual text

**Order number:** HO-06210I

For 30 m rescue rope or up to 100 m guide rope.

The rope can be fastened on the inside of the pouch with a carabiner. This way, when using this as a means to secure a return route, a secure connection is assured. The escape opening on the underside, which can be shut tight, makes it possible to prevent the rope running out in an uncontrolled way. (without content)

With the flame-resistant strap with metal carabiners (HO-06220) the bag is carried over the shoulder. The integrated emergency release appliance, which releases at a force of 250-300 N, minimises the risk of getting stuck. (shoulder strap not included)

- flame resistant material, tested in a 6-burner test at 950 ( $\pm$  50 °C) like respiratory protection full-face masks class 3
- emergency release appliance
- the mobility of the wearer is not inadmissible restricted
- the physical burden on the wearer is not increased disproportionately
- the protective function of other PPE is not endangered

This bag comes with its own labeling request. The front offers space (16 x 8 cm) for the vehicle name or the name of the district or both.

material: rtx® 950

dimensions: 35 cm x Ø 13.5 cm

weight: 0.21 kg

certified according to DIN 14922:2020-02

**Please ensure sufficient contrast between bag's basic colour and text!**

This is an individual product. It can not be exchanged.
