

PETZL AVAO BOD FAST Fall Arrest Harness

Order number: HR-02320

Comfortable harness for fall arrest, work positioning and suspension

- semi-rigid, wide hip belt for optimal support
- lightweight, breathable construction for excellent air circulation
- ergonomic shape of foam padded shoulder straps reduces friction points on neck or throat
- when the hip belt is loaded, the load is transferred to the shoulder straps and distributed to the shoulders
- hip belt and shoulder straps are equipped with self-locking DOUBLEBACK buckles for quick and easy adjustment
- leg loops with automatic FAST LT buckles for easy and quick opening and closing (even with gloves) without changing the setting
- shoulder straps have a stowage system for the MGO lanyard connectors for fall protection, so that the lanyard does not interfere and the connectors are always within reach
- side lanyards can be folded to prevent snagging when not in use
- self-locking DOUBLEBACK buckles on the back of the harness between the waist belt and leg loops allow adjustment for use of the dorsal fall arrest eyelet. In the event of a fall into this eyelet, a shorter adjustment allows weight to be distributed to the leg loops so the user hangs comfortably in the harness while waiting for rescue
- six pre-shaped, sheathed material loops
- two attachment options for CARITool equipment holders
- four attachment options for TOOLBAG tool bags

Specifications

- central retaining eyelet: for hanging a descender or attaching a lanyard for work positioning.
- side attachment points: for attaching a work positioning lanyard to both attachment points
- front fall arrest eyelet at chest level: for suspending the fall arrest system
- fall arrest eyelet at the rear: for attaching the fall arrest system
- eyelet on the back of the waist belt: for hooking in a

restraint system
