

PETZL FALCON Seat Harness

Order number: HR-02441

Lightweight, comfortable sit and hold harness for free hanging rope rescue operations.

Its metal ventral attachment loop allows load distribution between the waistbelt and leg loops. Its lightweight, comfortable construction of semi-rigid, narrow hip belt and leg loops with 3D foam padding ensure an optimal balance between comfort, weight and volume savings for use on the ground, in locomotion or free-hanging operations. The self-locking DOUBLEBACK buckles on the hip belt and the FAST LT buckles on the leg loops allow for easy, quick adjustment. The buckle on the back is for attaching a TOP or TOP CROLL L chest harness.

- side webbing eyelets designed for occasional use to reduce pack size and weight.
- the webbing side loops can be converted to metal loops using the RING2SIDE accessory.
- the metal buckle on the back can be used to attach a TOP or TOP CROLL L chest strap.
- five gear loops: two large, rigid loops at the front for easy access to gear and three small, flexible loops at the back that do not interfere when wearing a backpack
- two attachment options for CARITool equipment holders

Specifications

Material: Polyamide, polyester, aluminium

Central retaining eyelet: Yes

Side retaining eyelets: Yes

Eyelet on the back of the waist belt: Yes

Size 0:

Waist circumference: 65-80 cm

Leg loops: 44-59 cm

Weight: 0,90 kg

Size 1:

Waist circumference: 70-93 cm

Leg loops: 47-62 cm

Weight: 0,915 kg

Size 2:

Waist circumference: 83-120 cm

Leg loops: 50-65 cm

Weight: 0.945 kg
