

EDELRID FUSE, mobile fall arrest device for Rope

Order number: HR-03007

The EDELRID FUSE runs incomparably well from the first meter and is the only system on the market that fulfills the standards EN 353-2, EN 12841-A, RfU 11.075 and ANSI Z359.15 for up to 140 kg working load - approved for horizontal applications

- Integrated RFID chip for simplified application documentation
- Separation of blocking mechanism and activator makes the device more reliable and safe. (patent registered)
- Activation of the clamping cam from a speed greater than 2 m/s
- no toothed clamping cam (gentle on rope, prevents rope breakage in the event of overload and allows clamping to be released without complete unloading)
- locking function for tight securing in the working position
- easy hooking and unhooking from the rope, without disconnecting from the karabiner
- due to the use of DEFUSER fall arresters, the impact force is 30 % lower than the standard

approved rope diameter: 10mm - 12mm

EN 12841-A, EN 353-2, ANSI Z359.15, PPE-R/11.075
