

## EDELRID DEFUSER RESCUE, compact drop damper for FUSE

**Order number:** HR-03008

The specially developed DEFUSER RESCUE absorber only be used with the FUSE fall arrester.

It is light, compact and the maximum impact force is 30% below the standard.

- for work with heavy loads as well as rescue situations with transfer of a helpless person into the own system
- Payload from 50-220 kg

Length: 210 mm

With EDELRID FUSE (HR-03007) = EN 12841-A, + Fuse = 353-2, + Fuse = ANSI Z359.15

The compact energy absorber can withstand user loads of up to 220 kg. The high load capacity enables users to work with heavy equipment and offers an additional reserve for rescue situations where users need to bear the weight of the person in need of assistance on their own system. At 4 kN, the maximum impact force is significantly lower than the legally stipulated maximum of 6 kN. The window makes it possible to visually check the intactness of the energy absorber at any time.
