

PETZL ABSORBICA-I 80 Energy Absorber, 80 cm, without fastener

Order number: HR-04020

ABSORBICA-I is a single lanyard with compact energy absorber designed for progression on a horizontal lifeline (rope or cable) or on an elevated platform, without passing intermediate anchors. It has several installation options on the harness and can be used with different types of connectors. Depending on the connectors used, ABSORBICA-I is certified to American, European and Russian standards.

- by tearing the strap of the fall arrester, the impact force exerted on the user is reduced
- suitable for users weighing between 50 and 130 kg
- progressive opening of the shock absorber reduces the acceleration forces exerted on lightweight users
- compact shock absorber so as not to hinder the user
- durable fabric cover with an opening system at the ends protects the shock absorber from abrasion and splashes and allows regular inspection of the shock absorber
- frequent hooking/unhooking: with a carabiner held in the correct position by a STRING element (supplied with the lanyard)
- quasi-permanent connection: with a screw-on RING OPEN eyelet, whose round shape ensures optimal positioning
- the end of the lanyard can be equipped either with a carabiner or with a MGO OPEN connecting element with a large snap opening

Specifications

material: polyester, nylon

length without connectors: 80 cm

weight: 270 g

CE EN 355 when used with EN 362 connectors, ANSI Z359.13
12 feet when used with ANSI Z359.12 connectors, EAC
