

PETZL ABSORBICA-Y 150 Energy Absorber, length 150 cm

Order number: HR-04080

ABSORBICA-Y is a double lanyard with compact energy absorber, designed for progression on a vertical structure or a horizontal lifeline, and when passing intermediate anchors. It has several installation options on the harness and can be used with different types of connectors. Depending on the connectors used, the ABSORBICA-Y is certified to American, European, and Russian standards.

- by tearing the strap of the fall arrester, the impact force exerted on the user is reduced
- suitable for users weighing between 50 and 130 kg
- progressive opening of the shock absorber reduces the acceleration forces exerted on lightweight users
- compact energy absorber so as not to obstruct the user
- FLEX version with elastic straps of 150 cm so as not to interfere with the user's movement
- durable fabric cover with an opening system at the ends protects the energy absorber from abrasion and splashes and allows regular inspection of the energy absorber
- frequent hooking/unhooking: with a carabiner held in the correct position by a STRING element (supplied with the lanyard)
- quasi-permanent connection: with a screw-on RING OPEN eyelet, whose round shape ensures optimal positioning, or with a SWIVEL OPEN swivel to prevent twisting
- the ends of the lanyard can be fitted either with carabiners or with MGO OPEN fasteners with a large snap opening

Specifications

material: polyester, nylon, high-modulus polyethylene

length without connector: 150 cm

weight: 430 g

CE EN 355 when used with EN 362 connectors, ANSI Z359.13
12 feet when used with ANSI Z359.12 connectors, EAC
