

## **PETZL ABSORBICA-Y 150 MGO Energy Absorber, 150 cm, with two fasteners MGO**

**Order number:** HR-04090

ABSORBICA-Y MGO is a double lanyard with compact energy absorber, designed for progression on a vertical structure or a horizontal lifeline and when passing intermediate anchors. The 150 cm version has elasticized arms, to avoid hindering progression. With two MGO large-opening connectors, it is certified to European and Russian standards.

- by tearing the strap of the fall arrester, the impact force applied to the user is reduced
- suitable for users weighing between 50 and 130 kg
- progressive opening of the shock absorber reduces the acceleration forces exerted on light-weight persons
- compact shock absorber so as not to hinder the user
- durable fabric cover with an opening system at the ends protects the shock absorber from abrasion and splashes and allows regular inspection of the shock absorber
- frequent hooking/unhooking: with a carabiner held in place by a STRING element (supplied with the lanyard) or with a MICRO SWIVEL swivel to prevent twisting
- quasi-permanent connection: with a screw-on RING OPEN eyelet whose round shape ensures optimal positioning, or with a SWIVEL OPEN swivel to prevent twisting

### Specifications

material: polyester, nylon, high-modulus polyethylene, aluminum

length without connectors: 150 cm

weight: 1.91 kg

CE EN 355 when used with EN 362, EAC connector
