

KONG Diapason Heavy Duty Sling, for rescue and locomotion in narrow places

Order number: HR-04190

Heavy duty spacer for locomotion in closed rooms. Heavy duty sling KONG DIAPASON for use in narrow spaces (e.g. shafts or towers) and closed rooms (confined space).

Stable shape so as not to injure the head of the hanging person even under load. Two screw carabiners included. The DIAPASON can also be connected to the karabiners with a standard belt.

The EXPERT and PROFI WORKER from SINGING ROCK are particularly suitable because they already have two sewn emergency attachment points on the shoulders.

supplied with:
2 screw carabiners

weight: approx. 0.5 kg
