

EDELRID FORAS TRIPLE LOCK, alucarabiner

Order number: HR-10041

The materials are getting lighter, the webbing narrower. To prevent them from slipping, slimmer and slimmer carabiners are needed. However, these have the disadvantage that they do not open wide enough to ensure easy hooking. With the FORAS this is different!

The lightweight aluminum carabiner for webbing up to 25 mm wide opens laterally!

- Triple Lock closure for an extra plus in safety
- H-profile construction for best possible material utilization with minimum weight
- Lateral opening gate creates a large opening width of 15 mm
- Load capacity lengthwise: 23 kN

Width: 48 mm

Length: 81 mm

Material: aluminum
