

## EDELRID CUPID, openable ring

**Order number:** HR-10045

Openable ring according to EN 362-M for a permanent and direction-independent connection of load-bearing equipment elements.

The design of the CUPID makes do with a single screw and no other individual parts. The screw is never loaded along its axis and even if it is lost, the loaded ring remains closed. With an opening width of 12 mm, the installation of rope end connections, slings and metal components is easily possible.

- Inner diameter: 44 mm
- Minimum breaking load: 20 kN

Material: aluminum
