

PETZL VULCAN Screw-Lock Steel Carabiner

Order number: HR-10225

VULCAN is a high-strength steel carabiner designed for use in difficult environments. The large-capacity asymmetrical shape is ideal for setting multiple anchors. VULCAN can be connected to the CAPTIV bar to favor positioning of the carabiner along the major axis, to limit the risk of it flipping and to keep it integrated with the device.

- high-strength steel carabiner for use in harsh environments, particularly suitable for setting up multiple anchors
- fluid interior design limits the risk of having a catch point and facilitates rotation of the carabiner
- Keylock system to avoid any involuntary snagging of the carabiner
- may be used with a CAPTIV positioning bar to favor loading of the carabiner along the major axis, to keep it integrated with the device, and to limit the risk of it flipping
- H cross-section ensures an optimal strength/weight ratio and protects markings from abrasion
- SCREW-LOCK: the manual screw-lock with red band provides a visual warning when the carabiner is unlocked

material: steel

major axis strength: 45 kN

minor axis strength: 16 kN

open gate strength: 18 kN

gate opening: 29 mm

weight: 235 g

CE EN 362, NFPA 1983 General Use, EAC
