

Static Rope Static Secure Tendon, length 60 m

Order number: HR-20240

A rope for any application where the sheath and the core may suffer damage. When using this rope you will significantly increase your safety margins, in cases where mechanical damage to the rope due to sharp edges or falling objects. Thanks to the unique sandwich-type construction of braided layers and the use of specially developed staple fibers, the rope is able to hold the suspended person or load even in the event of considerable sheath or core damage. Even if the rope is heavily damaged, the suspended person has enough time to abseil to the ground or to a safe anchor point.

diameter: 11 mm

elongation (50–150 kg): 4.5 %

number of standard falls: 20

sheath slippage: 0 mm

tenacity: 35 kN

min. tenacity with knots: 19.8 kN

CE EN 1891
