

PETZL Equipment set ascending and descending

Order number: HR-24101

The equipment set for ascending and descending devices for simple rescue from heights and depths in accordance with DIN 14800-16 is suitable for simple rescue from heights and depths of up to 30 meters. With the pre-assembled 4:1 pulley, people can be rescued from a wide variety of situations. The components Ring Open and Captiv ensure a closed system and prevent unwanted opening.

The 4:1 pulley is supplied pre-assembled. The associated instructions for use are collected in the duffel bag.
