

PETZL JAG System, Haul Kit, length 2 m deployed

Order number: HR-24110

- allows pickoffs, making a releasable anchor, tensioning a system...
- can be coupled with an I'D descender to make a reversible rescue kit to pick off and evacuate a victim
- 4:1 mechanical advantage allows user effort to be divided by 4
- excellent efficiency due to sheaves mounted on sealed ball bearings
- deployment possible even when the distance to the anchor is very short, thanks to the extreme compactness of the collapsed system
- 7.7 mm lightweight rope. The mechanical advantage guarantees a good grip.
- kit always ready to use thanks to the flexible cover that prevents any risk of tangling
- haul end immediately identifiable thanks to the yellow color of the end of the cover
- the ends of the cover hold the connectors in position to facilitate clipping

supplied with

2x Am'D TRIACT-LOCK auto-locking carabiners

length, deployed: 2 m

length, collapsed: 0.34 m

rope diameter: 7.7 mm

sheave type: sealed ball bearings

working load: 6 kN

breaking strength: 16 kN

efficiency: 91 %

weight: 805 g
