

PETZL JAG RESCUE KIT, reversible rescue kit

Order number: HR-24140

- pick-off with the JAG SYSTEM haul kit, whose 4:1 mechanical advantage and excellent sheave efficiency allow the user effort to be divided by 4 when raising a victim in order to release him
- evacuation with the I'D S descender, whose ergonomic handle allows the user to easily control the rope's running speed during evacuation. Anti-panic function activates if the user pulls too hard on the handle, which brakes and stops the descent automatically
- JAG SYSTEM equipped with flexible cover that prevents any risk of tangling
- rope is pre-installed in the RING OPEN gated ring to allow better control of the descent and provide a system that does not easily come apart
- BUCKET bag for transporting the kit
- kit comes loaded and ready to use

supplied with:

JAG SYSTEM haul kit
