

## EDELRID KAA, haul system

**Order number:** HR-24160

The KAA is a prefabricated haul system for tensioning systems or lifting people during rescues. In addition, as the KAA is certified to EN 354, it can be used for workplace stabilization, as a restraint system (open/closed), and for controlled lowering. Its strap-based construction makes it the most compact and lightweight system on the market. Depending on the positioning, it offers a 4:1 or 5:1 lifting ratio with an efficiency of 91%. The KAA is packaged compactly but ready for immediate use, so that no valuable time is lost when it is required. A swivel is provided at each end to prevent the system from twisting. The hand lever on the draw cord makes it easier to pull and can also be used as a lowering lever.

- prefabricated haul system used for workplace stabilization, tensioning and as a restraint system
- very compact and light due to a strap-based design
- facilitates controlled lowering
- 4:1 or 5:1 lifting ratio
- efficiency 91%
- integrated RFID-Chip

minimum breaking strength: 22 kN

weight: 575 g (1.5 m), 891 g (4 m)

lengths: 1.5 m, 4 m
