

rescue-tec Rope Pouch Brannenburg, hook for b.a. and compartment for carrying sling

Order number: ID-109

For 30 m rescue rope (DIN 14920) or up to 100 m guide rope and carrying sling.

Version of the rope pouch with hook for b.a. (HO-01215) developed for the fire brigade Brannenburg with a compartment for carrying sling.

This rope pouch for capturing fragments can be fastened to nearly every breathing apparatus. It is hooked with one hook to the top retention belt of the breathing air cylinder and fastened using a rubber band over the cylinder valve. The pouch can be hooked off using a handle (pulled upwards) and removed.

The rope can be fastened on the inside of the pouch with a carabiner. This way, when using this as a means to secure a return route, a secure connection is assured. The escape opening on the underside, which can be shut tight, makes it possible to prevent the rope running out in an uncontrolled way.

In the side compartment (33 x 6 x 14 cm) there is enough space for a carrying sling according to EN 1865. (without content)

material: Cordura 1000D

dimensions: 40 cm x Ø 14 cm + 6 cm

weight: 0.4 kg
