

rescue-tec Mask Pouch Airport Vienna, Cordura, red

Order number: ID-141

This bag for a respirator was developed in cooperation with the fire brigade of Vienna Airport. The bag is attached to the back plate of the b.a. with the strap. The safety push button can only be opened in a defined direction so that the bag remains on the b.a. even when pulled. The large lid flap has an easy-to-grip handle so that the bag can be opened easily even with gloves.

The bag is labeled with the Logo of Vienna Airport.

material: cordura 1000D

dimensions: 32 x 32 cm
